PROFESSIONAL SUMMARY

Enthusiastic aspiring full-stack web developer specialised in MERN stack. Keen to create new and innovative websites by showcasing my skills. Looking forward to working with an interesting company to build unique websites.

PROJECTS

Clone of Nykaa |

An e-commerce website that consists of beauty and fashion products.

Features: Social Sign-in/Sign-up | Sorting the products according to the price, brands, and categories | Product Cart | Payment gateway.

Tech Stack: HTML | CSS | Javascript | React | Node | MongoDB

Areas of responsibility:

- Built the layouts of the cart page and the product gallery.
- Laid out the database schema and built the REST API for the same.
- Developed the Signup and Login pages.

A collaborative project built by a team of 4 executed in 5 days

Clone of YouTube's search feature |

A web app that provides the requested videos on searching in the search box.

Features: Searching for videos | Fetching videos from the API | Full-Screen window.

Tech Stack: HTML | CSS | Javascript

Areas of responsibility:

- Built the layout using HTML and CSS.
- Fetched the JSON data using API request.
- Implemented the search result in the frontend using DOM.

A solo project executed in 2 days.

LookO |

A web app that suggests the best outfit for you.

Features: Capture photo by accessing camera | Authentication | User History | Suggest related products according to result.

Tech Stack: HTML | CSS | Javascript | React.js

Areas of responsibility:

- Created react components such as help and support, submit queries & privacy policies.
- Created the components for the mobile screen.

A collaborative project built by a team of 5 executed in 5 days.
